[AM](#) Assignment: Reading assignment
by [Angshuman Modak](#) - Thursday, 13 March 2025, 7:13 PM

Dear all,

The [Google spreadsheet link](#) lists five research articles along with five groups, each consisting of 5 to 6 members. Each group is required to read the assigned research paper and present it before the class. The presentation duration will be 25 minutes for each group, with 15 minutes for the talk and 10 minutes for Q&A. Each member must present.

The date of presentation will be on March 29, 2025 at 10 am.

The assessment will be based on 1) the content and visuals of the slides, 2) the attitude and presentation style of the presenter, 3) ability to respond and discuss during the Q&A session and 4) effective time management.

In addition, each group should include at least one slide discussing whether the paper primarily addresses climate change impacts or adaptation, or both. You should provide a clear explanation supporting your reasoning.

Best,

Angshuman
